

About broomx

We are a technology company focused on the creation of immersive experiences in physical spaces. We develop products & services that provide shared immersive experiences without the need to use headsets.

Our flagship product, the MK360, is the world's first immersive projector. Its cutting-edge technology combines revolutionary components and abilities, creating a shared immersive experience in physical spaces.

MK's features and capabilities enable users to unlock their creative potential, from creators seeking extraordinary ways to showcase their work to individuals seeking interactive ways to experience a truly immersive experience.

Also, we design high-quality visuals to build personalized narratives attending

to multiple industries. We've developed a catalog of over one hundred curated content to be displayed by the MK. Our content is produced in house and through a partnership with prime content creators, which allows us to develop unique interactive media pieces.

From health to entertainment and from culture to hospitality, we are expanding to new territories and markets while constantly growing as a company.

Our products evolve to offer new solutions to an ever-changing world, such as the MXLive, which provides an immersive live streaming solution for overcoming challenges regarding broadcasting live events worldwide. The MXLive creates live recordings that transform spaces equipped with the MK360, instantly immersing viewers contemplating the visuals.
