

# MK2

## Offline control

The MK devices require an internet connection to enjoy the Broomx Platform. In exceptional cases when no internet connection is available, basic control of the MK devices is possible over the local network. This will only allow you to play back 360° videos which have been previously included in a Playlist and downloaded to the MK device. No interactive applications, content management or data collection is available.

 Please disable phone data and all automatic connection to other Wi-Fi networks.

### Power on

1. Power on the projector using the remote control.
2. Connect the tablet / PC / smartphone to the MK device's Wi-Fi network:
  - **Network: MK#\_Service**
  - **Password: MK\_Service**
3. Open a web browser and enter the following URL:
  - **192.168.12.1**
4. Navigate to the "Playlists" section and select any content for playback.

### Power Off

1. In the control interface, go to: **Menú → Settings → Standby.**
2. Power off the projector using the remote control.
3. Only disconnect from power for transportation to another location.  
Before disconnecting from power, wait 3 minutes after powering off the projector.
